OBJECTIVE

Computer Science student specializing in Information Technology with hands-on experience in AWS Cloud Architecture and Cloud Computing. Applied 11 AWS services to design scalable, secure, and highly available cloud environments. Completed AWS Academy Cloud Foundations and Cloud Architecting programs along with the Huawei ICT Academy HCIA-Cloud Service V3.5 course. Currently developing DevOps skills through the Digital Egypt Pioneers Initiative (DEPI). Seeking a Cloud Engineer Intern or DevOps Intern role to apply skills in AWS, Linux, networking, Infrastructure as Code, and CI/CD automation.

EDUCATION

- **Menoufia University** – Bachelor of Computer Science, Information Technology Sep. 2023 – Expected July 2027

EXPERIENCE

- **Cloud Computing Trainee (AWS)** – National Telecommunication Institute (NTI)
 - Utilized 11 AWS services including EC2, S3, RDS, VPC, IAM, Lambda, SQS, CloudFormation, Elastic Beanstalk, Elastic Load Balancing, and Auto Scaling to architect cloud solutions.
 - Configured 2 core scaling components, Elastic Load Balancing and Auto Scaling, to build resilient and highly available cloud environments.
 - Engineered event-driven architectures utilizing 2 AWS messaging and compute services, Lambda and SQS, for serverless application decoupling.
 - Implemented 4 core VPC components including public and private subnets, route tables, security groups, and network architecture controls.
 - Automated cloud resource provisioning using AWS CloudFormation templates as 1 Infrastructure as Code framework for repeatable deployments.
 - Executed Amazon RDS relational database deployment and management across 1 managed database environment with structured schemas.
- **DevOps Track Trainee** – Digital Egypt Pioneers Initiative (DEPI) 2026 – Present
 - Developed practical competencies across 6 core focus areas including DevOps principles, cloud infrastructure, automation, CI/CD pipelines, Linux administration, and deployment workflows.
 - Implemented core DevOps practices across 4 operational pillars: software delivery workflows, infrastructure management, automation scripts, and cloud-based environments.

PROJECTS

- **AWS Scalable Cloud Architecture Project**
 - Designed and deployed a scalable web application infrastructure on AWS using 3 core services: EC2, S3, and VPC.
 - Configured secure Linux server instances, custom route tables, and strict security group rules for network access control.
 - Applied 4 foundational cloud architecture principles to support scalability, high availability, security, and structured application deployment.

CERTIFICATIONS

- **AWS Academy Graduate** – Cloud Foundations
- **AWS Academy Graduate** – Cloud Architecting
- **Huawei ICT Academy** – HCIA-Cloud Service V3.5 Course (Certificate of Completion)
- **National Telecommunication Institute (NTI)** – Cloud Computing Training Certificate

TECHNICAL SKILLS

- **Cloud Computing:** AWS, Huawei Cloud, Cloud Architecture, Serverless Architecture, Event-Driven Architecture
- **AWS Services:** EC2, S3, RDS, VPC, IAM, Lambda, SQS, CloudFormation, Elastic Beanstalk, Elastic Load Balancing, Auto Scaling
- **DevOps & Automation:** DevOps Fundamentals, CI/CD, Infrastructure as Code, Automation, Deployment Workflows
- **Networking & Security:** VPC, Subnets, Route Tables, Routing, Security Groups, Network Architecture
- **Operating Systems & Databases:** Linux, SQL, Amazon RDS
- **Core Competencies:** System Design, Problem Solving, Cloud Infrastructure, Troubleshooting

LANGUAGES

- **Arabic:** Native | **English:** Very Good
